## Software Engineer - (Backend/Frontend)

**Software Engineer** with 3+ years' experience in cybersecurity and full-stack development, delivering secure, efficient solutions in **C#, Java, Python, C++, and JavaScript**. Thrives in dynamic environments, rapidly learns new technologies, and collaborates effectively to produce innovative products that excite users.

## Skills

**Programming:** Java, C#, C, C++, Rust, Python, JavaScript, Go, Ruby, HTML/CSS

**Testing/Scrapping:** Jest, Playwright, Selenium, Puppeteer, JUnit, JMeter

**Frameworks/Tools:** Spring, Ruby on Rails, React, Node.js, MongoDB, Postgres, SQL, FastAPI, Nodejs, .NET, AWS

## Experience

**Full Stack Developer Intern**, Startnoo – New York (Remote) Aug 2024 – Dec 2024

- Refactored WordPress websites to Ruby on Rails, enhancing performance and maintainability.
- Redesigned UI for a more engaging and energetic feel, utilizing Figma for wireframing and Bootstrap for styling.
- Increased site traffic and user interactions by implementing modern, responsive designs.
- Collaborated with cross-functional teams to improve backend architecture, reducing page load times by 15%.

**Technical Support Engineer / QA Engineer**, OPSWAT – Tampa, FL Aug 2022 – Aug 2024

- Provided frontline technical support to global customers, resolving over 300 high-priority issues with a satisfaction rating of 96%.
- Automated internal tools for customer support using LAMP and MEAN stacks, reducing ticket resolution time by 25%.
- Designed and executed over 150 test cases for enterprise security software using Jest and custom testing frameworks, ensuring 98% product reliability.

**Software Engineer Intern**, OPSWAT – Tampa, FL Jan 2022 – Aug 2022

- Designed a Programmable Logic Controller (PLC) simulation using Python and OpenPLC to enhance CIP lab security training.
- Developed a proof-of-concept cyber lab showcased at conventions, driving engagement with customers and potential clients.
- Created demos to highlight OT security protocols, leading to increased client interest by 40%.

## Education

**Florida Polytechnic University**– Lakeland, FL Aug 2020 - Dec 2023

BS in Computer Science - *Software Engineer*

## Projects

### Google Maps Lead Scraper

- Designed in Rust to scrape Google Maps for keywords and extract business information for lead generation.
- Automated custom email generation and sending, reducing manual efforts by 80%.

### Full-Stack Ticketing System

<https://github.com/jnleyva816/Full-Stack-Ticket-System>

- Built a ticketing system using the MEAN stack (MongoDB, Express.js, Angular, Node.js) to manage and streamline customer support workflows.
- Implemented features such as ticket prioritization, status tracking, and notifications, improving team efficiency by 30%.

### MicroGravity Research (Capstone Project)

- Designed and programmed a PCB for reading sensor data from a payload dropped from a drone at 300M.
- The sensor data was read and utilized for research in microgravity for NASA.
